THIRD INTERNATIONAL CONGRESS ON FUNGAL CONSERVATION

Muğla, Turkey - 11-15 November 2013

ANNOUNCEMENT AND FIRST CIRCULAR

The first Congress of this series (Córdoba, Spain, 2007) made fungal conservation a global issue, and the second (Whitby, England, 2009) prepared the way for forming the *International Society for Fungal Conservation*. With its exciting programme, this third Congress will build on those achievements. It will be the first meeting of our young Society, and the first time an *International Congess on Fungal Conservation* has been hosted outside Europe. Protecting fungi involves science, infrastructure and politics, so those topics provide the focus for this Congress. Scientific sessions will look at threats and their impact on fungi. Workshops will develop infrastructure by spreading the skills needed for fungal conservation. Round tables will be used to develop conservation policy and make plans to implement it. The goal is a global cadre of mycologists with the same vision of protecting fungi and with the necessary skills and experience to realize that vision.

Specific objectives

To promote fungal conservation by bringing mycologists and conservationists together so that they can:

- · exchange experience and opinions;
- become familiar with the existing infrastructure for fungal conservation, particularly within the IUCN;
- · explore political issues relating to fungal conservation;
- report on the status of fungal conservation in each region;
- review scientific work relevant to conservation, particularly in respect of threats to fungi;
- · identify the challenges facing fungal conservation;
- develop infrastructure, policies and strategies to deal with those challenges;
- improve skills in publicising fungal conservation, in red listing, and in identifying important fungus areas;
- make formal awards recognizing achievements in fungal conservation.

Every effort will be made to keep the cost of participation to a minimum. The official language of the Congress will be English. The location of the Congress will be Gökova Bay, a small seaside resort about 20 km north of Marmaris in Muğla Province. In November, the climate is mild with some precipitation. There are international airports at Bodrum (60 km) and Dalaman (40 km).

If you are interested in participating, please fill in the following form (please type or use BLOCK CAPITALS) and return it to: congress@fungal-conservation.org
